

PHLEARN

FREE SAMPLE PACK

Your 5 Free LUTs for Photo & Video

Start Here

Install guide for Photoshop, Premiere Pro, DaVinci Resolve and Final Cut Pro

WELCOME

You can be color grading in 2 minutes.

Thanks for downloading. You have 5 LUTs from five PHLEARN packs. They work on photos and on video.

1

Unzip

Double-click the zip on a Mac. On Windows, right-click and choose Extract All.

2

Find your app

Photoshop: pages 4 and 5. Premiere Pro: page 6. DaVinci Resolve: page 7. Final Cut Pro: page 8.

3

Load a .CUBE file

Use the .CUBE version unless your software asks for something else.

WHAT'S INSIDE

5 LUTs from 5 packs

Peachy Cream	Bright & Airy
Crisp Slate	Cool Tones
Matte Anchor	Film Tones
Tate Olive	Moody Vibes
Rich Cork	Warm Tones

Each LUT comes in 4 formats, in the All Formats folder:

.CUBE

Use this one

Works in Photoshop and almost every video editor

.3DL .CSP .ICC

For other software

Only if your app does not accept .CUBE

The **Photoshop Quick Install** folder holds just the five .CUBE files, ready to load.

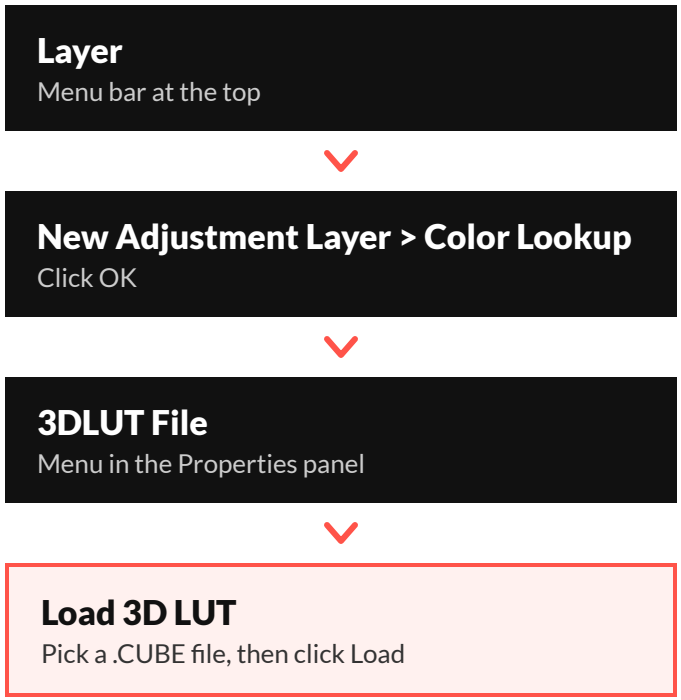

PHOTOSHOP · QUICK INSTALL

Load a LUT into one document

The fastest way to try a LUT. Nothing gets installed.

1. Open a photo in Photoshop.
2. Choose **Layer > New Adjustment Layer > Color Lookup** and click OK.
3. In the Properties panel, open the **3DLUT File** menu and choose **Load 3D LUT**.
4. Select a **.CUBE** file from the **Photoshop Quick Install** folder and click Load.
5. Set the strength with the layer's **Opacity**. Most LUTs sit best between 40 and 80 percent.

WHERE TO CLICK

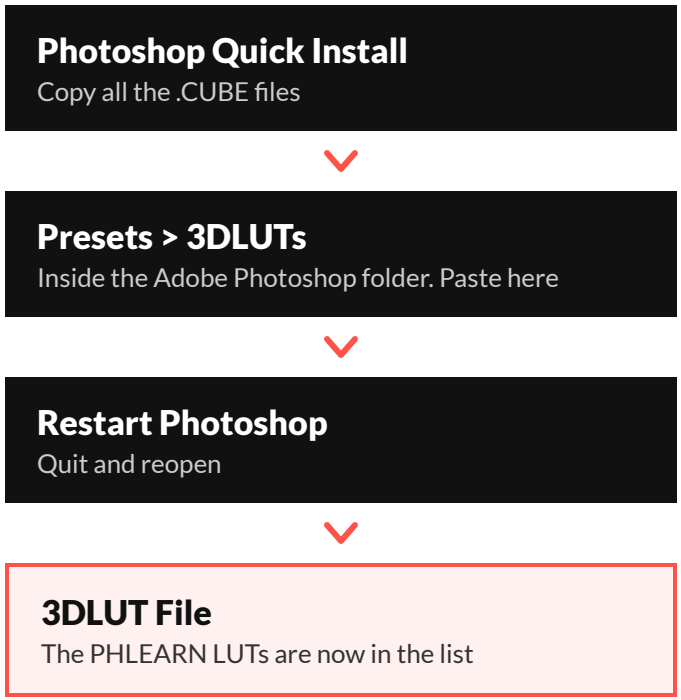

PHOTOSHOP · PERMANENT INSTALL

Add the pack to the LUT menu

1. Open the **Photoshop Quick Install** folder, select all the **.CUBE** files and copy them.
2. Open Photoshop's **3DLUTs** folder (paths below).
3. Paste the files in. Your computer may ask for your password.
4. Restart Photoshop.
5. Add a Color Lookup adjustment layer and pick the LUT from the **3DLUT File** menu.

Mac: Applications > Adobe Photoshop 2026 > Presets > 3DLUTs
Windows: C: > Program Files > Adobe > Adobe Photoshop 2026 > Presets > 3DLUTs
Use your version year if it is not 2026.

WHERE TO CLICK

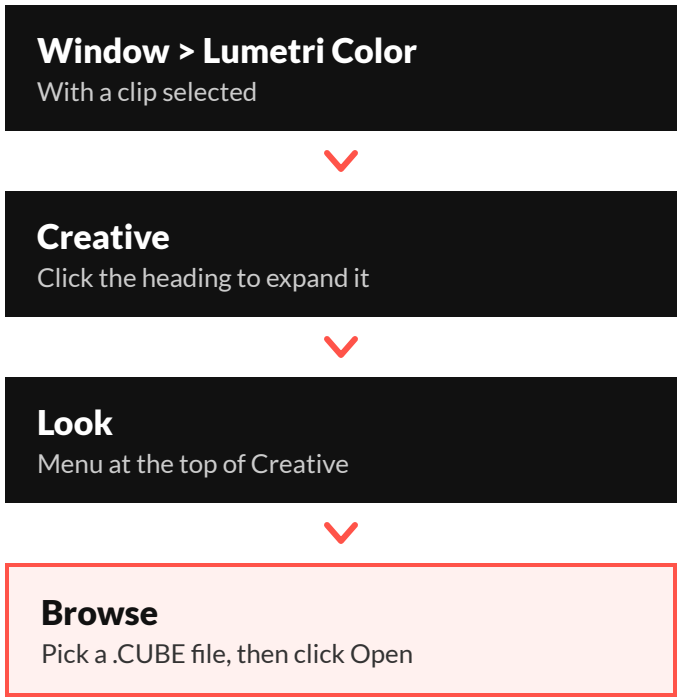

VIDEO

Premiere Pro

1. Select a clip and open **Lumetri Color** (Window > Lumetri Color).
2. Click the **Creative** heading to expand it.
3. Open the **Look** menu and choose **Browse**, near the top of the list.
4. Select a **.CUBE** file from the Photoshop Quick Install folder and click Open.
5. Set the **Intensity** slider. Most footage looks best between 50 and 80.

Keep them in the Look menu. Copy the .CUBE files into Adobe > Common > LUTs > Creative and restart Premiere Pro. Full folder paths: phlearn.com/install-luts

WHERE TO CLICK

VIDEO

DaVinci Resolve

1. Click the gear icon at the bottom right to open **Project Settings**, then click **Color Management**.
2. Scroll to **Lookup Tables** and click **Open LUT Folder**.
3. Create a subfolder named after the pack and copy the **.CUBE** files into it.
4. Back in Resolve, click **Update Lists**, then **Save**.
5. On the Color page, open the **LUTs** panel at the top left and drag a LUT onto a node.

LUTs missing? Skipping Update Lists is the usual reason. To lower the strength, open the Key panel for that node and reduce Key Output Gain.

WHERE TO CLICK

Project Settings
Gear icon, bottom right

Color Management
In the list on the left

Lookup Tables
Scroll down to find it

Open LUT Folder
Copy the .CUBE files in, then click Update Lists

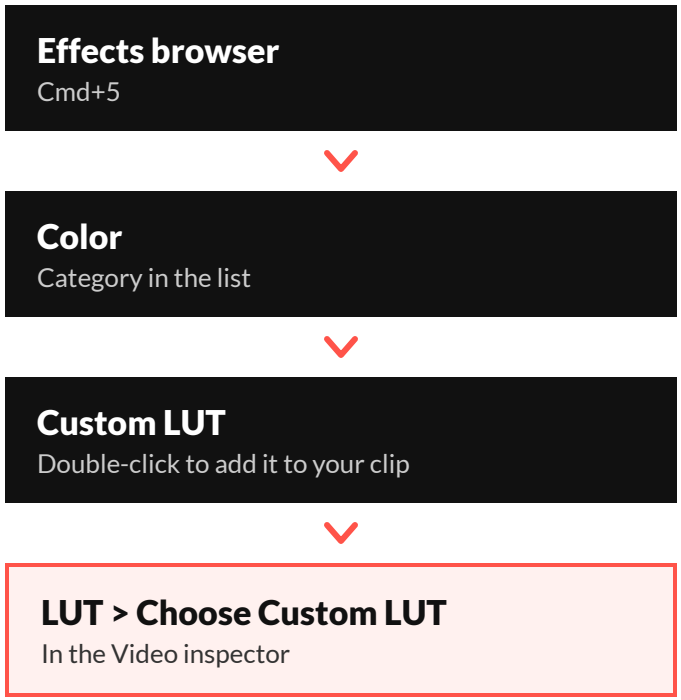

VIDEO

Final Cut Pro

1. Select a clip and open the **Effects** browser (Cmd+5).
2. Choose the **Color** category and double-click **Custom LUT**.
3. In the Video inspector, open the **LUT** menu and select **Choose Custom LUT**.
4. Select a **.CUBE** file from the Photoshop Quick Install folder and click Open. Leave Input and Output on Rec. 709.
5. Set the **Mix** slider to taste.

Next time the LUT is already in the LUT menu. No browsing needed.

2 TIPS

Using LUTs well

1

Fix the basics first

Set exposure and white balance, then add the LUT on top. A LUT grades color. It does not correct it.

2

Turn it down

Too strong? Lower the layer opacity in Photoshop, or the Intensity or Mix slider in your video editor.

Using Lightroom Classic, After Effects, Capture One or another app? Steps for those are at phlearn.com/install-luts.

PHLEARN PRO

You have 5 of the 175 LUTs in PHLEARN PRO.

175
LUTs in 35 packs

600
Lightroom presets

200+
